Sec. -. That the term "school houses," in the act of 17th June, 1870, chapter 30, was intended to embrace all collegiate establishments actually used for educational purposes and not for private gain; and that all taxes heretofore imposed upon such establishments in the District of Columbia since the date of said act are hereby remitted; and where the same, or any part thereof, have been paid, the sums so paid shall be refunded; but if any portion of any said building, house, or ground, in terms, excepted is used to secure a rent or income, or for any business purpose, such portion of the same, or a sum equal in value to such portion, shall be taxed. Sec. -. That all laws inconsistent with the provisions of this act be, and the same are hereby, repealed.

LETTERS FROM THE PEOPLE.

The Sewerage Question. Editor Evening Star: - As the writer was somewhat familiar with the plan of Mr. Severson in former years to clean out the old canal. and as I perceive by the papers he proposes to act the same farce over again, (only this time it is a sewer,) I would like to say a few words ► About 1863 he, by persistent effort, obtained

from the councils an appropriation to test his plan on the canal. The work was done according to his plans, which extended from 17th street wharf to the inner channel, from thence by causeway to the Monument grounds. In the last he had several flood gates erected, though whose aid all of the deposits of filth, &c., was to be swept out, and through to the Eastern Branch. The public is familiar with the entire failure of the whole plan; and as a consequence of such failure, the destruction of the canal, and the construction of the sewers over which the present controversy has arisen.

And as steps are about to be taken to repeat the same piece of folly, I desire to enter my protest by giving you the following facts:— The Anacostia river at ebb tide discharges a very large body of water, which is pressed forward by the large northwest branch and many other tributaries, so that it descends with the speed of a mill-dam, and as the channel is on this side, we have a volume of water from 30 to 40 feet deep and 300 feet wide descending until it meets the flood tide of the Peter at the Arsenal, and is forced back into James Creek, then into the Tiber sewer. and, as a consequence, from the pressure of the two rivers combining to make this result, and the obstruction of the bridge and flood-gates, the water in the sewers reaches 17t1 street before that in the river. This being a fact, you will perceive that Major Randolph and Mr. Severson, by their respective plans. propose to force water up hill, or against a superior pressure from without. As this statement may be doubted, I will say that after Mr.. Severson's floodgates were in operation I, feeling an interest in the matter, invited the committee on canals to meet me on the cana', naming the hour when the tide would turn In the presence of the committee I threw pieces of wood into the canal, which, instead of going east as promised, went in the oppo-site direction. The committee was disappointed; nothing was said of the matter; the floodgates, by reason of this fact, were abandoned, as from the fast filling canal it was perceived they were a nuisance, until finally they were lifted out by mud-machines, thrown on the banks, broken up, and carried off by the poor for firewood.

Now, then, you will perceive that if Mr. Severson plan is adopted, he must, to get a sufficient quantity of water, erect his flood gates on the identical spot he had them before, because to do anything less than this, or in other words to utilize Babcock's Lake alone would be folly, as it will not hold water enough to wet the floor of the sewer its entire length, and as a consequence the sediment would settle not further east than 11th street, and choke the sewer in pinety days, as the canal was choked between 6th and 7th streets to the height of two feet above high water, as you may recollect. From the above, you will perceive that Major

Randolph's plan is equally objectionable, as he, like Mr. Severson, proposes not only to force water up hill, but to force it against the combined pressure of two large rivers. Now let us admit for the sake of the argument, that he erects a pump of immense power, he would never be able to create a current in the sewer, or move a pound of sand one hundred yards from where his water enters, for the simple reason that the floor of the sewer is so low that it is never clear of water, at the laterals from 6th to 17th street discharge sufficient water to, at all times, have a depth of at least two feet, which all flows towards 17th street, as the fall is in that direction. To drive back all this water and uproot all this sediment, he would not have over one hour in every six. If this is so, of which I have no doubt, his fires must cool and his men lay idle for five hours out of every six, as the only time he could work would be at mean low tide, as he would hardly undertake to drive back the Anacostia and Potomac rivers when forcing their water in James Creek.

This whole problem would be solved if the authorities would: First-Build two twelvefeet sewers, one down 6th the other down 11th street, to the river, connecting the same to the B-street sewer, which would at once relieve the latter.

Second-Cause to be dug and properly constructed large basins and dams at the following points: 8th street and Boundary (Brown's) n.w.; 2d and Boundary (Beal's) n.w.; 3d and Boundary (Gales') n.e., by the erection of these dams where those respective runs empty into the sewers, you will prevent the washing of immense quantities of sand and gravel into the sewers, which forces its way principally down the North Capitol street sewer until it reaches the vicinity of Maryland avenue, and is there met by the river tides and settles, to be removed at an expense, or for the privilege of selling the sand and gravel to builders, when it is filthy and not fit to be used for any purpose. By checking the flow of this material (which is of a very superior quality) in the basins, the privlege of procuring it could be rented, and in stead of being an expense it would be a source of profit. Respectfully,

HENRY LYLES. A DESERTED WIFE WANTS A DIVORCE .- Today Messrs. B. G. Lovejoy and Reginald Fen-dall, for Elvira Mena Fredericka Louise Brinkmann, filed a bill against August Philip Brinkmann for a divorce from bed and board, and for alimony. The petitioner alleges that, under the name of Risch, in March, 1875, she was married to respondent in New York, and shortly after they moved to this city, but in a few months, under the pretence of visiting his relatives he left her, and for a long time absented himself and contributed nothing to her support, and she was compelled to give music lessons for a living; and she charges that she gave him no good cause for deserting her, and that he thus acted in order to get her to sue

for a divorce. She also asks alimony, &c. THE INFORMER'S MOIETY IN LOTTERY CASES.—In the Police Court (Judge Snell) to-day, Mr. A. B. Williams, counsel for defendant in the case of the United States agt. John Clark, found guilty in this court several weeks ago on an information for keeping a shop for the sale of lottery tickets and policy, and sentenced to pay a fine of \$100, filed a motion on behalf of John H. Jenifer, the informer therein, to correct the judgment of the court in the following particulars:-First, by entering on the records the distribution of the fine imposed according to section 1,174 revised statutes of the District of Columbia; second, to order payment of a moiety of the fine to John Henson Jenffer, the informer of record in said case. The section referred to fixes the penalty for such offense at not less than \$100 nor exceeding \$1,000, one-half of which shall go to the informer and the other half to the District. Mr. Williams claimed that the judgment in all such cases should be made in the manner prayed for, so that the question as to who is entitled as informer can be settled afterwards. After some discussion Judge Snell overruled the motion and directed that the paper be filed and a memorandum be made on the court record as follows:-" And now, after judgment, Jenifer, by his attorney, A. B. Williams, moves the court to amend its record and adjudge that said Jenifer be paid one-half of the fine in said case as 'the informer,' as provided by law; and the court disallows the motion, because the motion does not show by any evidence or affidavit of said Jenifer, nor is there evidence before the court, that in fact he was the informer in this case and entitled as such to any portion of the said

DECORATION DAY .- The committees of the Grand Army of the Republic on the arrangements for decoration day have entered on the active work, and the arrangements are well under way, but the full programme is not yet ready for publication. The headquarters of the decorating committee are at the Congregational church, and donations of flowers, &c., may be sent there until 9 o'clock on Thursday morning. Doubtless many persons will leave the city for Gettysburg, where the President and several members of the Cabinet will attend the ceremonies, and General Butler and ex-Governor Curtain will deliver the addresses. The principal point of attrac-tion in this vicinity will be Arlington, at which Mr. G. E. Corson will preside, Rev. Dr. Ran-kin will read the poem, and Hon. C. E. Williams, of Wis., will deliver the oration, Rev. A. F. Mason officiating as chaplain. At Soldiers' Home, Mr. C. C. Royce delivers the oration, and Mrs. M. A. Dennison will read the poem. The programme for the services at Congressional Cemetery has been prepared. Mr. G. J. Wood will preside; Rev. John Chester will offer prayer; a select choir (D. F. Mc-Gowan leading) sing a selection: original historical poem (written by Rev. G. Taylor) read by Major John Williams; ode to the nation's dead (Taylor), by the choir; oration by Capt. H. J. Gifford; memorial ode, by choir; benediction, followed by decoration of graves. The soldiers' graves at Oak Hill Cemetery and Battle Cemetery and the monuments through-out the city will be decorated, but no public services will take place.

THE RACES AT BRIGHTWOOD YESTERDAY .-The starters for the pacing race, free to all, best three in five, at Brightwood yesterday afternoon, were Belle, Frank, Salome and Doc. Garges. Belle won in 2:41, 2:46 and 2:43; Salome second, Frank third and Doc. Garges fourth. The other feature of the day was the walk of William Crawford, the pedestrian, against a horse—he to walk a quarter of a mile while the horse trotted a half. The horse Joe Bradley was pitted against him and beat him badly. Crawford, however, walked his quarter in 1:2114. The horse had the start of a number of yards, and ran a portion of his half a mile. Another trial was demanded. After some talking and appropriate the start of t some talking and caucussing the race was declared off, and the mare Lady Morrow was brought out to trot against Crawford's walk. The start was fair : Crawford struck out sturdily, and finished in 1:24. He completed his quarter-mile about ten yards ahead of the mare on her half-mile, and was declared the

THE BEST BALL GAME EVER PLAYED IN WASHINGTON.—The Nationals met the New Bedford nine yesterday afternoon and were theirs. The game was, perhaps, the best ever played in Washington. The crowd in attendance was very large. All the seats were almost doubly occupied, and the grass in front and to the right and left was spotted with men and boys. Both nines played grandly, with but few errors. The Nationals on the whole did better betting then the Name grandly, with but few errors. The Nationals on the whole did better batting than the New Bedfords, but when they got a run nearly in a bad batter would leave the runner on third base. The score was 2 to 0. Both these runs were made by the New Bedfords in the 7th inning. The excitement was intense, and the cheering received by Stone when he made the first run was deafening. The applause during the whole game was tumultuous, being equally the whole game was tumultuous, being equally divided between the home nine, who suffered their first defeat this season, and the New England nine that inflicted the defeat.

District Government Affairs. WATER SUPPLY FOR HIGH GROUND IN WASH-INGTON.

District Engineer Hoxie, has transmitted to the Commissioners of the District of Columbia, a communication saying: "At your request I have examined into the question of affording temporary relief to the high ground of the city of Washington in the matter of water supply, and have the honor to report as follows: It will be necessary to divide the city into high and low service districts. For the former, the 36 inch District main should be used exclusively. The supply for the high service district should be taken from this main and elevated by steam power; the best location for the pump being the immediate v cinity of the main near Rock creek. A stand pipe can be conveniently located on the line of 16th street extended, above Boundary st., near the crest of the hill. For the present purpose a pump capable of lifting 2,000,000 galons 133 feet in twenty-four hours may be located near the corner of 17th and U streets northwest, on the line of the 12-inch main, with a stand pipe of sufficient capacity to constitute a small reservoir—say 120,000 gallons on Meridian Hill, to be connected with Capitol Hill by a small independent main. The use of the water should, of course, be restricted to localities now suffering from low pressure in the mains. An expenditure not exceeding twenty-five to thirty thousand dollars should suffice for this. The great ultimate want of a larger conduit from the present distributing reservoir, and a new accumulating reservoir on Meridian Hill, should not be lost sight of, and is in no way affected by this temporary

arrangement. This has been endorsed by the Commissioners as follows: "Referred to the engineer, who will invite bids for construction and erection of an iron stand pipe, to be placed with stone, brick, and galvanized iron, 25 feet in diameter and 50 feet high, to be placed in 16th street extended; for one duplex pump, having capacity to lift 100,000 gallons of water 133 feet per hour, and for two boilers, each equal to the requirments of the pump. All to be placed in position in complete readiness for use. The plans and specifications will be prepared without delay. The necessary pipes will be laid as soon as practicable, so as to connect the higher grounds of the northwest section with the high service herein provided for. The necessary provision will also be made for con-necting the higher points of Capitol Hill with the stand pipe, after it has been established and in working order.'

It relieves the child from pain, cures wind colic, regulates the bowels, and, by giving relief and health to the child, gives rest to the mother. TO LADIES AND GENTLEMEN.-We wish to call attention to A. Fischer's Chemical Scouring and Dyeing Establishment, No. 906 G street near 9th street. By promptly adopting the latest improvements, whether of American or European invention, he is enabled to do his work in a manner not to be equalled by those not possessing these facilities. His cleansing and dyeing Ladies' and Gent's suits are, in fact, the cheapest in the city on account of his superior work. N. B.—A specialty of his consists of the constant of the city o sists in removing spots from costly party dresses; 25 years' experience. His dry cleanser removes grease spots effectually from any article, and careful pressing gives them an appearance as if newly made. Kid Gloves cleaned; two pair for 25 cents.
